

Instructor: **Russ Horbal** BMR.PT, CAT (c), BPE., ED.(cert), RISPT, Diploma Sport Physiotherapy

Dates: Saturday October 19th – Sunday October 20th 2019

Times: 0800-1600 hours

Location: Room R170 – College of Rehabilitation Sciences,
Rady Faculty of Health Sciences – University of Manitoba,
771 McDermot Avenue, Winnipeg, Manitoba

Cost: \$550.00 (including GST)

Written withdrawal from the course before October 11, 2019 will be subject to a \$25.00 fee. After October 11, 2019, refunds will be provided only if the spot can be filled by another applicant.

(refreshment breaks and lunch will be provided both days)

Registration Limited to 28 Participants

Registration Deadline: Friday October 11th, 2019

Course Objectives:

Upon completion of this course participants will be able to:

- define and discuss the normal anatomy and biomechanics of the foot and ankle as they function in the lower kinetic chain;
- define and discuss the pathomechanics of the foot and ankle as they relate to dysfunction in the lower kinetic chain;
- perform a thorough biomechanical assessment of the foot and ankle as they function in the lower kinetic chain;
- prescribe appropriate active footwear with reference to foot, ankle and lower kinetic chain mechanics;
- define and discuss pathology-specific orthotic therapy intervention including design, selection, prescription and fabrication of a neutral cast for subsequent orthotic fabrication; and
- define and discuss pathology-specific physical therapy intervention for common foot, ankle and lower kinetic chain conditions.

Course Outline

1. Anatomy and Biomechanics Review
2. Pathomechanics of the Foot and Ankle in the Function of the Lower Kinetic Chain
3. Biomechanical Assessment of the Foot and Ankle
4. Footwear Therapy:
 - *Matching Your Patient's Biomechanics and Functional Demands Proper Footwear*
5. Orthotic Therapy:
 - *Pathology Specific Orthotic Decision Making and Treatment*
 - *Casting/Lab Process Review*
6. Biomechanical Approach to the Treatment Foot & Ankle
7. *Case Studies*
 - a. Plantar Fasciitis/Plantar Heel Pain
 - b. Forefoot Pain – Metatarsalgia, Morton's Neuroma, Plantar Plate Injury
 - c. Hallux Problems
 - d. Posterior Tibial Tendon Dysfunction
 - e. Achilles Tendinopathy
 - f. Systemic Conditions
 - i. Rheumatoid Patient
 - ii. Diabetic Patient
