

We are currently looking for a motivated full-time Physiotherapist to join our multidisciplinary team!

You will build a caseload easily at our established clinic. We have a good working relationship with the surrounding physicians and communities & have a team focused environment.

Services we provide:

- Physiotherapy
- Massage Therapy
- Athletic Therapy
- Reconditioning programs
- Vestibular treatment
- Pelvic health treatment

We have a wonderful group of therapists that work collaboratively to learn from each other and provide the best patient care.

Qualifications:

- Licensed and in good standing with CPM
- Member of CPA with CPA liability insurance
- Strong communication and documentation skills
- Willing to share our values & engage in clinic culture

What We Offer to Our Employees:

- Employee commissioned based remuneration
- Group extended health benefits plan
- Prioritization of assessments each week to build your caseload quickly
- Regular support in building and maintaining your caseload
- Paid onboarding and training
- No admin work. We manage all reception, appointments, laundry, invoicing, and billing for you
- Rehabilitation assistants responsible for patient support, cleaning etc.
- Professional development and education allowance
- Direct clinical mentorship program (see below for more information)
- Opportunities for participating in paid community outreach & marketing (e.g. community events, webinars)
- Electronic charting
- Team learning sessions
- Giving back to the community and local organizations
- An environment where we celebrate patient & staff success
- All PPE & other supplies
- Opportunities to expand duties into leadership roles

New grads are welcome to apply and can take advantage of our Direct Mentorship Program. The Direct Mentorship Program is on-going until you feel like a clinician superstar. You would start from hourly compensation and progress to a commission fee-split.

How does it work?

- You will meet regularly with a dedicated clinical mentor
- Practice new and advanced techniques to build and sharpen your skills
- Get help to build a full caseload and maintain it
- Learn how to create a treatment plan and keep patients committed to it so they graduate and achieve their outcomes
