

Nancy Goodall graduated from the University of Manitoba in 1991 with a Bachelor of Medical Rehabilitation. I have always lived, worked and played in Manitoba. I have spent 13 years of my career working in private practice and 15 years working in public practice. The last 6 years of my public practice experience has been as a Clinical Service Leader overseeing the Orthopedic Technology Services Team at Shared Health –Health Science Center. I have really enjoyed my career so far as a physiotherapist and all the different roles that it has allowed me to do. Outside of work I am a very active person through my involvement in the Manitoba Triathlon community as a member of the Triple Threat Triathlon Club and the Sail Manitoba community on Lake Winnipeg.
